

MEDICAL

Laser Micromachining Ltd. is the ideal partner for R&D, prototyping and batch production of novel medical devices.

LML offers a flexible, cost-effective & responsive service which allows new product ideas to be evaluated quickly and high quality samples to be produced with precision & accuracy.

The extensive expertise of LML can provide:

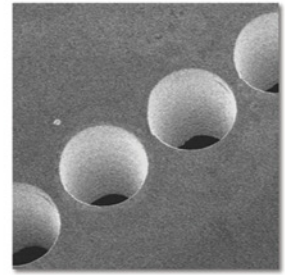

- ~ High density filters & meshes in metals & plastics with hole sizes down to 1µm.
- ~ Precision cutting & drilling of glasses including crack-free machining of cover slips.
- ~ Machining of holes, slots & other shapes in thin polymer catheters.
- ~ Quality marking and tagging of products.
- ~ Micromachining of thin metal foils and polymers for medical devices.
