

# MICROELECTRONICS

Laser Micromachining Ltd. is the ideal partner for R&D, prototyping and batch production of high specification photonics products.

LML offers a flexible, cost-effective & responsive service which allows new product ideas to be evaluated quickly and high quality parts to be produced with precision & accuracy.

The extensive expertise of LML can provide:

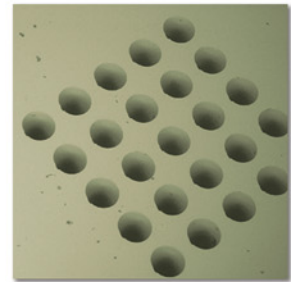

- ~ Patterning of high resolution electronic circuits in metal layers on a variety of substrates.
- ~ High speed drilling of blind & through via holes.
- ~ Scribing, dicing & machining of substrates such as silicon, glass, ceramics & composites.
- ~ Precision repair of high value devices by laser isolation and removal of defects.
- ~ Fabrication of high quality deposition, printing & transfer masks.

**HIGH QUALITY & PRECISION**

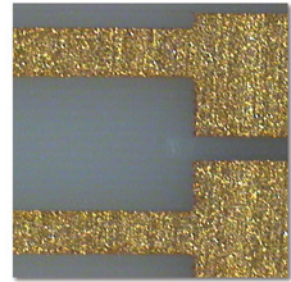

**RAPID RESPONSE**

**NO JOB TOO SMALL**

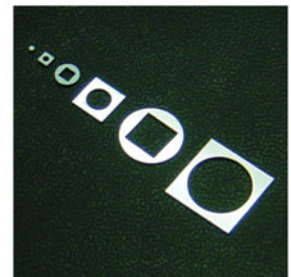

**COST-EFFECTIVE SERVICE**

*Via Hole Drilling*

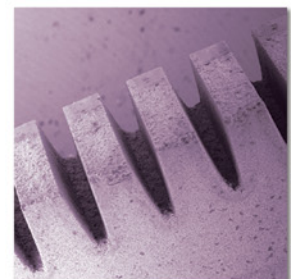

*Patterning of Electrodes*

*Dicing of Substrates*

*Isolation & Repair of Circuits*

*Precision Machining of Devices*
