

PRECISION ENGINEERING

Laser Micromachining Ltd. is the ideal partner for R&D, prototyping and batch production of high specification photonics products.

LML offers a flexible, cost-effective & responsive service which allows new product ideas to be evaluated quickly and high quality parts to be produced with precision & accuracy.

The extensive expertise of LML can provide:

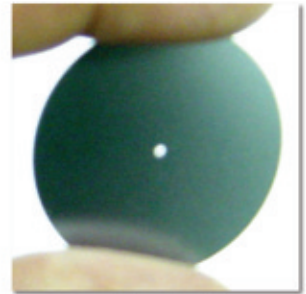

- ~ High precision cutting, milling and drilling of metals, ceramics, silicon, glass and plastics.
- ~ High speed drilling of meshes in metal foils with hole sizes as small as 2 microns.
- ~ In situ trimming of machined and pre-assembled devices without damage to adjacent parts..
- ~ Production of high tolerance slits and holes for high specification products.
- ~ Manufacture of stencil and other masks for high precision applications.

HIGH QUALITY & PRECISION

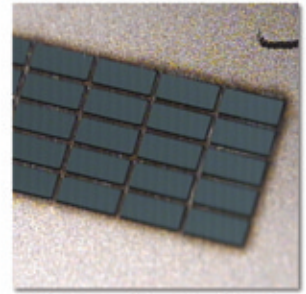

RAPID RESPONSE

NO JOB TOO SMALL

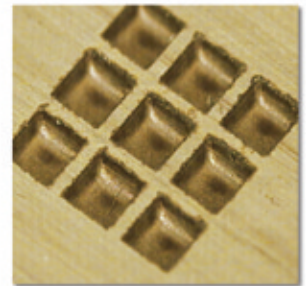

COST-EFFECTIVE SERVICE

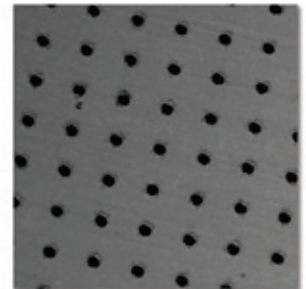

Precision Drilling

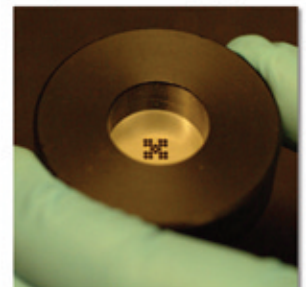

High Quality Machining

Flexible Micromilling

High Speed Drilling of Meshes

Precision Cutting of Thin Foils
